EXAMINER'S COMMENT

1. This Office Action is in response to an Applicant's Appeal Brief filed on April 25, 2006.
Overall, claims 3, 4, 6-21, 23, and 24 are pending in this application.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or teach a SOx regeneration means that is performed after a NOx conversion efficiency, computed after a NOx regeneration means, is less than a threshold value. In this way, the SOx regeneration means in the pending application is separate and independent from the NOx regeneration means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of one patent: Hepburn (U.S. Patent 5,743,084) discloses that a SOx purge is performed (step 120) after a NOx conversion efficiency determined after a NOx purge is less than a threshold value (step 112 with YES answer) and a lean time is less than a predetermined value (step 90 with NO answer).

Communication

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Tu Nguyen whose telephone number is (571) 272-4862.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Thomas E. Denion, can be reached on (571) 272-4859. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
